FREDERICKSBURG, VA., Jan. 21.—

A farmers' institute will be held in the courthouse here on Thursday, January 2th. for the benefit of the farmers in the counties configuous to Fredericksburg. It will be under the management of Mr. J. H. C. Beverley, of Essex county, president of the State Board of Agriculture and member of the board for this district. State Commissioner of Agriculture G. W. Kolner will be present and make an address. There will be other speakers from both the State and National Agricultural Departments.

state and National Agricultural Departments.

Mr. Charles Gill, of Stafford county, has sold the mineral rights on his farm, near Garrisonville, to the Pyrites Company for \$1,200. This company, which is composed of Northern capitalists, has spent \$50,000 in developing the pyrites veins in that section.

The canning business was overdone in the Northern Neck last season, and it is thought there will not be so many canneries in operation this season. The fish factories also did a poor business and the oyster shucking houses have had an unprofitable winter. Some of the latter will not be in the business next year. The scarcity of oysters, bad weather and a short crop have made the business unsatisfactory.

Truckers along the Rappahannock River are undecided about an early peacrop this year, and the probability is that the acreage will be smaller than usual. Last year's results were very unsatisfactory.

CHARLOTTESVILLE, VA., Jan. 21.—
The grand jury of the Torporation Court, after a three days' session, brought in to-day 165 indictments against five well known liquor dealers of the city.

The majority of the indictments were against liquor dealers, who sold to University students in violation of an old Virginia statute, considered a "dead letter" by many persons, but a matter yet Virginia statute, considered a "dead letter" by many persons, but a matter yet to be decided by the courts. Next in number were the indictments for selling to minors, and last those against the whiskey sellers, who insisted upon trading on Sunday. Five retail liquor houses are named in the counts, and these incriminate ten persons—either owners or bartenders—with one exception, that against a man of proper age, who bought intoxicants for minors. Six indictments were brought against one house, five against another, thirty-five against a third, thirty against a fourth and twenty-seven against the fifth. The other two indictments were against the man who is alleged to have bought liquor for minors.

FIGURES INCREDIBLE

Value of Truck Grown in Virginia Last Year Amounted to \$9,083,274

FOURTH STATE IN UNION

Representative Maynard Working Hard to Have Department do More Field Work.

(From Our Regular Correspondent.) WASHINGTON, D. C., Jan. 21 .- Representative Maynard, who is actively at work in behalf of the proposition to have an appropriation made for the purtion with the tobacco, trucking and rice growing, has collected many statistics with which to impress the Committee on Argiculture with the importance of the industries named. It is his desire to have

industries named. It is his desire to have regular reports made on these crops, resilating to the acreage, prospects and probable production, just as is at present made on the cotton crop.

The Second Virginia District, represented by Mr. Maynard, and the First District, represented by Mr. Jones, are among the greatest truck growing sections in the world. The counties of Accomac and Northampton, in the First District, and the counties of Norfolk, Princess Anne and Nansemond, in the Second District, are the great trucking counties of Virginia.

District, are the great trucking counties of Virginia.

Mr. Maynard has been at great pains to collect the figures from the Department relative to the importance of truck growing. The Department of Agriculture has furnished the figures, which show that the value of the truck grown in Virginia last year amounted to the almost incredible sum of \$9,083,274.

The total number of acres devoted to truck alone amounted to 5,753,191. The average value of the product per acre was \$42.00.

The total acresge in tobacco was 1,101,483. The average value of the product per acre was \$51.71.

duct per acre was \$51.4.

The total value of all vegetables raised in the United States is \$242,170,148, making vegetables rank fifth in importance among the crops grown in the United States. Truck growing, which is a purely commercial subdivision of the vegetable class, ranks eighth.

The truck crop of the United States is next in value to the cereals, exceeding in value the fruit crops, if the berries be excluded in the estimate of the value of fruit. Strawberries, for instance, are not classed with the fruits in Virginia, but with the truck. The value of the truck grown in the United States exceeds the value of the orchard fruits by \$34,000,000, speaking in round numbers.

by \$1,00,00, epsales bers. Of the \$242,170,148 at which the vegetables grown in the United States are valued, \$57,390,348 is credited to the family gardens. From this latter must be taken the sum of \$19,033,470, which represents the value of the vegetables grown for the cannerles.

This would make the total value of the truck raised in the United States every year reach the total of \$195,000,000 in round numbers.

year reach the total of \$105,000,000 in round numbers.
Virginia Is ranked by the Department of Agriculture as fourth in the Union in the production of cabbags, the acreage being 10,105. Maine comes first, with 25,201 acres; New York came second, with 25,231 acres, and Pennsylvania third, with 10,851, only slightly ahead of Virginia and the company of the company o

with 10.501, only singitty alead of virginia. Virginia is third in the production of cucumbers, the acreage being 41,603. The acreage of kale amounted to 751, far ahead of any State in the Union. The acreage planted to spinach was 504, which made Virginia first in the cultivation of this vegetable also. In addition to the foregoing. Virginia also has a high place in the list in the production of muskmelons (third), onlons and both varieties of polatoes.
